Sreedevi Sreekumar
CEO, Edureka

Todd Takala

has successfully completed the online Specialization

Data Engineering for AI and ML Pipelines

In this Specialization, learners acquired data engineering skills for AI and machine learning systems, from ingesting and processing data with Apache Spark and PySpark to designing Delta Lake and Medallion Architecture pipelines on Databricks. Learners also gained machine learning-adjacent skills in feature engineering, feature store development, and pipeline automation using MLflow and Databricks Jobs. Throughout the Specialization, learners applied these skills in hands-on projects, ending with a complete pipeline that turned raw data into machine learning-ready features.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
